CtrlChanges

Manage text changes in InDesign and InCopy

CtrlChanges is a plug-in for InDesign and InCopy users that require a clear and accurate solution to a common problem – to visually be able to see what has been changed in a document. And more.

CS5.5

What's new? With CtrlChanges you always have the answer.

In a situation where more than one user is working with a document, it is crucial to know what has been changed in the InDesign document. With CtrlChanges you don't need to spend valuable time trying to find what has been changed. CtrlChanges tracks all text changes in a document, and displays added or deleted text in the Layout view.

CtrlChanges is available for both InDesign and InCopy, and in three versions to fit your specific needs. Try it out today, free trials are available on our website: www.ctrlpublishing.com

Key Features:

- Keep track of any text changes
- Display added text in Layout view
- Display deleted text in Layout view
- Keep track of who applied the text changes
- Keep track of when the change was made
- Print changes
- Include changes in PDF
